Stefan Reinhart

INTACS® PRINCIPAL ASSESSOR · AUTOMOTIVE SPICE®

N P L **F**

Profile

20 years of experience in international project and quality management, 15 of them as an assessor of project and quality management systems. Beyond best practices and metrics, what matters is understanding how the processes of an organisation interact and developing strategies to steer them effectively.

Professional experience

since 2024 — **Scalian Germany AG** · Manager

Medium- and long-term projects in interim management, process improvement and consulting. Building strategic cooperations and partnerships.

since 2022 — **B.SMART UG · a-spice.de** · Founder, managing director since 07/2026

Analysis and assessment of organisation, production and development processes against ISO 9001, EN 9100 and ISO/IEC 33020. Process improvement strategies. Training and certification of intacs® Process Experts and Provisional Assessors.

2017 – 2022 — **JTEKT Europe** · Head of Engineering, Acquisition and Projects

Line manager of a development team; responsible for a high-performance steering system for the BMW 3 Series, X1 and X2. Problem solving in an intercultural context.

2016 – 2017 — **Visteon Electronics** · Interim Project Manager

Led the problem-solving team, restored cooperation between partners and suppliers, product launch on schedule.

2013 – 2016 — **Elektrobit Automotive** · Project Manager

Technical lead of the international software team "NBTevo Asia Navigation" (approx. 40 people, Munich and Iwaki, Japan). Software supplier quality in the "Renault SW consultant" project. ASPICE assessments and gap analyses.

2012 – 2013 — **Harman Automotive** · Programme Manager APQP

Responsible for development quality in all BMW projects. Set up a first cross-departmental quality management system for software quality.

2011 – 2012 — **Hannover University of Applied Sciences** · Visiting lecturer, applied computer science

Internet technologies, office applications, IT fundamentals and data security.

2010 – 2012 — **Robert Bosch Car Multimedia** · Software Project Manager

Technical lead of 115 engineers developing a navigation system for Nissan (LCN 1.5 / LCN 2). Start of production on time and on budget.

2007 – 2010 — **Nokia** · Software Manager

Global responsibility for connectivity (Bluetooth, WLAN, UMA); requirements management, feature planning and product configuration for all S40 devices.
